

## Facilities

-car park -toilet -barbeque -picnic tables -rubbish bin

## Activities & Interests

-wildlife -fishing -bushwalking -bird watching -bird hide  
-history -beaches -swimming

## Track Description

The path around the Livingstone Island Nature Walk is a wide grass track, with a board walk across the salt marshes. The track is suitable for walking and running. The track and board walk are wide, making it ideal for pram walkers. However, there are a set of steps leading down to the board walk and several slight inclines and declines along the walk. It may be advisable to have assistance with prams in these areas.

There is a wide variety of wildlife inhabiting Livingstone Island. Around the salt marshes you may see Striped and Spotted Marsh Frogs, as well as many types of water birds. Take advantage of the bird hide to see a large variety of birdlife on Livingstone Island, including black swans, pelicans, spoonbills, herons and ducks. The island is also home to many kangaroos. Flora found on the island include Moonah trees, Coast Wattle, Coast Beard-Heath, and the Beaded Glasswort. A viewing platform at the north-end of the track offers views of the Glenelg River, the estuary mouth and the Southern Ocean.

## Directions

The Livingstone Island Nature Walk is located on Livingstone Island, at the end of Beach Road. Parking is available in the car park at the end of Beach Road, which is the beginning and end point of the walk.

## How to get there

The Community Walking Grants program is made available through the Victorian Government's Community Support Fund. The Glenelg Walking Strategy is a joint initiative of Portland District Health, Glenelg Shire Council, Glenelg and Southern Grampians Primary Care Partnership and South West Sports Assembly.
